The mandatory first-time application of the new IFRS 16 "Leases" accounting standard as of January 1, 2019 has a material impact on Deutsche Telekom's consolidated financial statements. The new standard requires payment obligations from existing operating leases to be discounted and recognized as lease liabilities; as financial liabilities, they increase net debt. At the same time the lessee capitalizes a right of use. Operating expenses previously recognized either in depreciation charges for capitalized right-of-use-assets or in interest expenses for discounted obligations from operating leases, as appropriate. This will significantly increase EBITDA without any attendant change in the economic circumstances. In the statement of cash flows, the repayment portion of the lease payments from existing operating leases will reduce net cash from/used in financing activities and no longer affect net cash from operating activities. Interest payments will remain in net cash from operating activities and thus also in free cash flow.

Effective as of Q3/2020 we have integrated the "TC Services" and "Classified ICT Services" (TC part), previously included in the Systems Solutions operating segment, into the operating segment Germany. In addition, the Telekom Global Carrier (TGC) and Network Infrastructure (NI) units, which were previously reported in the operating segment Europe, respectively the Group Headquarters & Group Services segment were transferred to the operating segment Germany. Comparative figures have been adjusted retrospectively.

Effective as of Q1/2021 we have integrated the Deutsche Telekom IoT GmbH, previously included in the Systems Solutions operating segment, into the operating segment Germany. Comparative figures have been adjusted retrospectively.

The figures shown in this report were rounded in accordance with standard business rounding principles. As a result, the total indicated may not be equal to the precise sum of the individual figures.
