

# we care for our Planet.

Company emissions to be reduced by 90% by 2030 compared to 2017

100% green energy in Germany since 2020  
Group-wide from 2021

Carbon-neutral by 2050 at the latest

25% lower emissions per customer by 2030 for manufacture and use of products

Deutsche Telekom is playing its part in protecting the environment and resources and is supporting the 1.5 degrees target laid down in the Paris Climate Agreement.\*

Conserving resources – **sustainable packaging** for all our own new devices

#### Green shop initiatives

Protecting the environment and safeguarding resources – for example with cellphone collection boxes and sustainable workwear. Using 100% recycled bags and doing away with paper materials will save 75 metric tons of paper in 2020 alone.

#### Products and packaging

From the packaging to the device, everything is designed with sustainability and resource efficiency in mind. That's why the Speedport Pro router and new MagentaTV box, for example, are made from recycled plastic.

#### Recycling devices

Our sustainable recycling scheme ensures smartphones and other devices are put to further use or recycled instead of landing in the garbage. Every year, Deutsche Telekom refurbishes around one million returned routers and takes back more phones than any other company in Germany.

#### Park and Joy

Avoiding traffic jams and reducing CO2 emissions – the Park and Joy app pinpoints and navigates drivers to available parking spaces and lets them pay for and extend their paperless parking ticket online. By mid-2020, parking spaces were ready and waiting in over 120 German cities.

#### Biere data center

Deutsche Telekom's data center in Biere, Germany, is one of the most efficient in the world, consuming around 30% less power than conventional data centers. Thanks to cutting-edge technology, the facility is cooled using just ambient air more than 80% of the time.

#### Green network

All the energy Deutsche Telekom consumes in Germany comes from renewable sources, meaning the network our customers use for surfing and making calls is not only the best – it's also green.

#### Green Pioneers

Some 250 eco-conscious employees are devising measures in our in-house ambassador program to promote responsible management and conduct. They share their experiences, organize workshops, and come together with staff from other disciplines to work on projects.
